This guide will help you get started and understand AutoCAD 2019 in less than an hour. It is based on AutoCAD for Windows, but works in the same way for other versions of AutoCAD. AutoCAD follows the lead of most other CAD applications by offering a Windows user interface. This means that you can run AutoCAD in Windows 7, 8, 10 or newer, and it will work in Windows 2000, XP, Vista or newer. You can still use your current programs, such as Internet Explorer and Word, and they will work fine. If you want to use a different program, you can do so by using the AutoCAD 2018 Quick Start Guide in the AutoCAD documentation and also by using programs such as Chrome and Firefox that are specifically designed for web browsing. Start your AutoCAD 2019 installation Before you start using AutoCAD, you have to install it on your computer. You can download the latest version from Autodesk's website. Once you have downloaded the installation file, follow the instructions on the website to install AutoCAD. If you are setting up AutoCAD for the first time, you will be asked for information that you must supply. You should not install AutoCAD if you are planning to use it for professional or commercial use. It is very useful for self-use, however. Autodesk is the only company that sells AutoCAD. You will find it at the Autodesk website. Setting Up AutoCAD 2019 AutoCAD 2018 and 2019 are very similar. When you are first starting AutoCAD 2019, the version number will be set to 2019. You will notice a prompt with the message "Welcome to AutoCAD 2019" on the Welcome screen. Press Enter to start using AutoCAD 2019. AutoCAD 2019 has been divided into two basic components, the AutoCAD and the clouds. Clouds In addition to traditional programs, you can now use the cloud to access your AutoCAD files from almost any computer that is connected to the Internet. This is useful if you want to share your work with people who do not have the same operating system, such as Mac or Linux users. Note that using the cloud requires an AutoCAD subscription plan. You can pay a monthly fee for cloud access or for the number of times you can access your AutoCAD files
