One of the columns should store a time. On storing it on the server, can this column be of type datetime or is datetime in the past? A: Unless you have a need to store the time to the second, I'd just store it as a date. It is unlikely you would ever need to support time components as small as seconds for the columns you are asking about. Regulars Feature When we meet the right person the right way, they are usually a good match. But that's hard to come by. Here are three tips on how you can make the most of your first date. 1. Research The longer you wait, the more you put off having to do this. You may know you want to meet the person but you haven't worked out what you'll do on the first date. The best way to work out what you would do is to do some research. Get to know yourself better - this will help you answer some really good questions.
