You can then modify your current plan and goals and it will then be re-calculated accordingly. For example, if you are currently struggling to lose weight, you can set yourself a plan for 5 days a week, and it will give you a list of workouts for the week, and even split them between morning, afternoon and evening. You can then add in rest days and modify your plan as necessary. It also keeps track of time, distance and calories burned, but it's not entirely necessary to use these in order to lose weight.
