Virtual Ps2 Memory Card Maker

I asked for advice in the Virtual Memory Card ma.. I tried out the Virtual Memory Card Manager but it did not work for me.. The file is about 3MB - anything smaller and it will not boot and anything larger than 5GB and it takes. Too much detail on my screen - but I would recommend Virtual PS2 Memory Card Maker.Q: wpf binding - how to convert string to datetime format Hi when I use code below. then I get the result like this. 6 - 11 Aug 2014 but I want to show it like this, 06 - 11 Aug 2014 Any suggest how to fix this? A: Not exactly knowing what you want, this is the current format of '06 - 11 Aug 2014': format string: {0:dddddd} format parameter: dd - single digit day so you need to format yyyy like the following: StringFormat='{0:dddddd yyyy}' Q: Using apollo-client with React and Auth0 I am just getting into using apollo-client for my React/Apollo app and I can't find a good method to bootstrap the authentication. I have a component that fetches the initial data and then on the render function I fire up a graphql query to get back the users. This is how I import my ApolloClientModule and QueryModule import ApolloClientModule from 'apollo-client'; import QueryModule from 'apollo-client'; import { ApolloClient } from 'apollo-client'; import { ApolloProvider } from'react-apollo'; import { HttpLink } from 'apollo-link-http'; import * as dataActions from './data/dataActions'; import LoginContext from './context/Login'; import { withCookies } from 'auth0-js'; const client = new ApolloClient({ link: new HttpLink({ uri: '', credentials: 'include', headers: { accept
